THE Galaxy

SERIES BY 

La collection « The Galaxy Series » by In The Loop se compose de 7 ampoules nouvelle génération, toutes plus surprenantes les unes que les autres.

Leur technologie innovante, permet de diffuser la lumière depuis leur base, à travers les formes créatives du plexiglas qui les compose, pour créer de véritables illusions lumineuses. Côté pratique, leur culot E27 les destine à tous les usages décoratifs, en suspension ou sur pied. La collection The Galaxy Series s'accommode très bien des effets de constellation avec plusieurs ampoules !

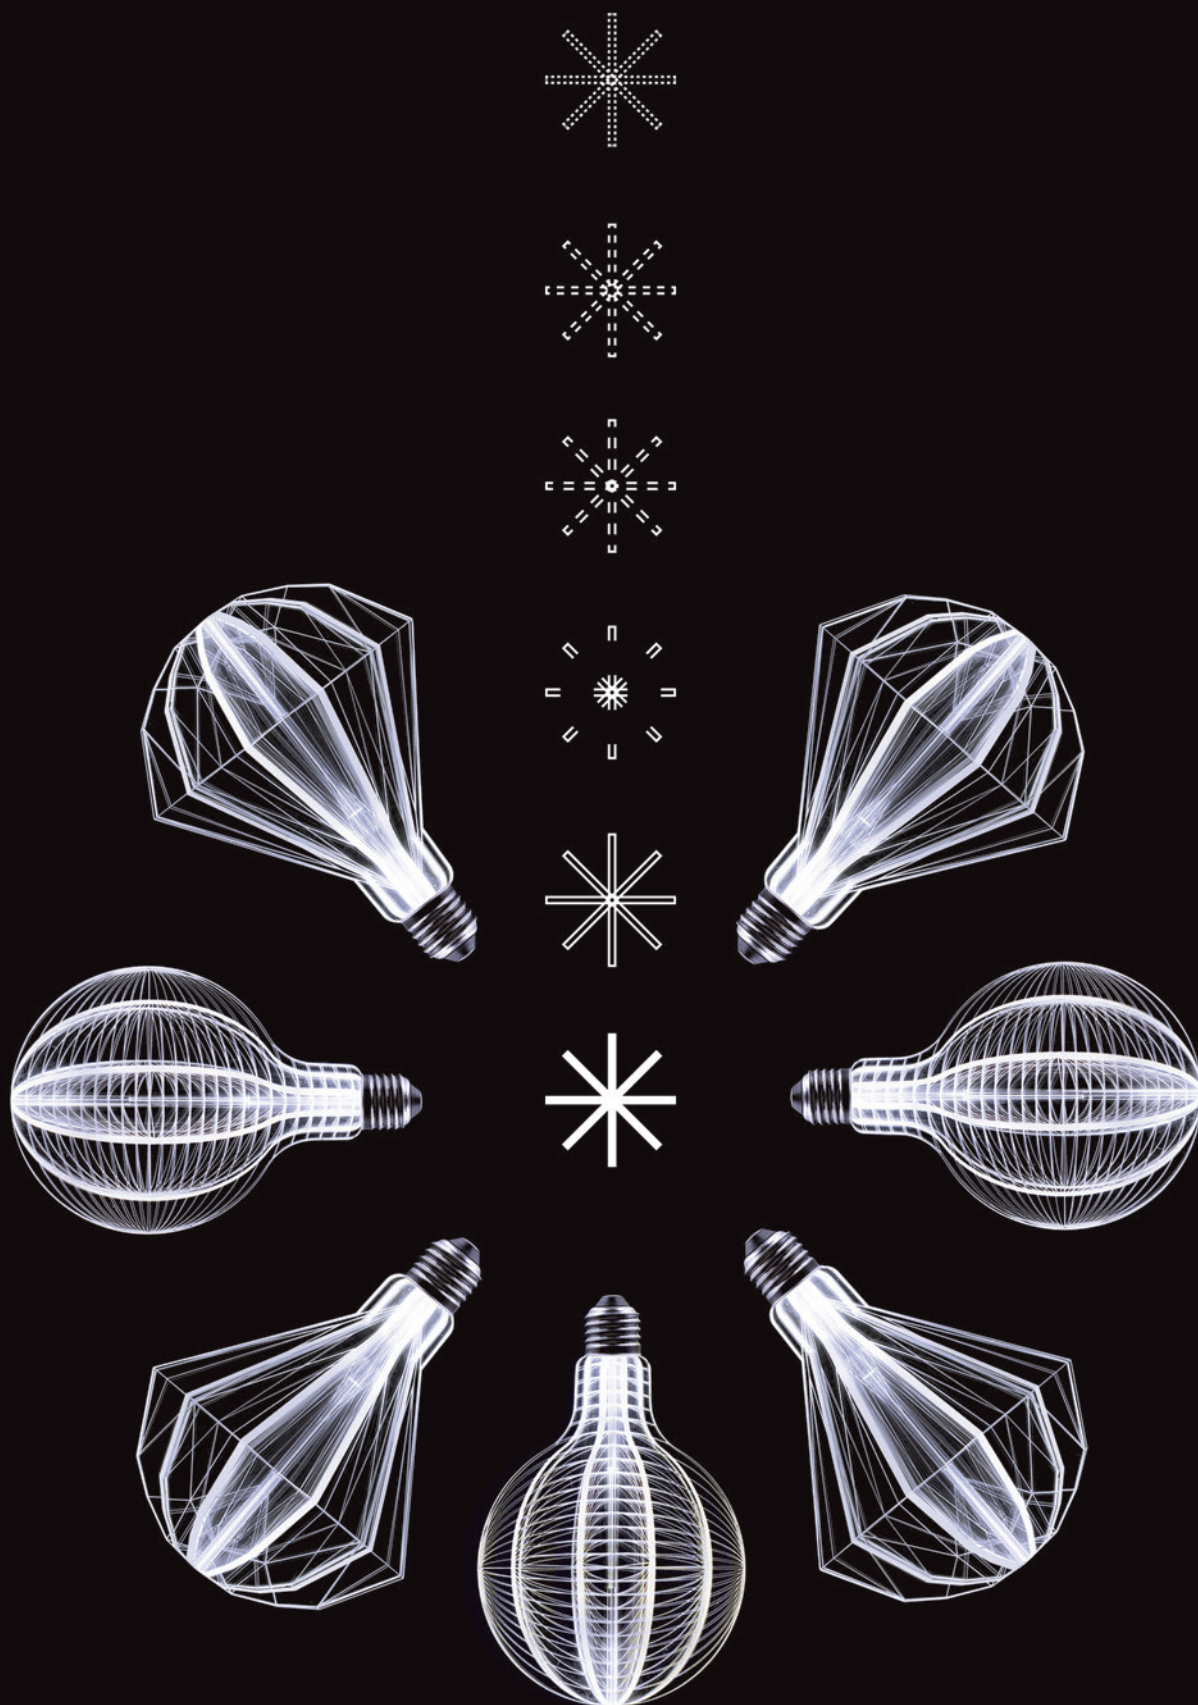

Enfin, comme ce sont des ampoules à leds, elles sont aussi douces pour l'environnement.

« The Galaxy Series » by in The Loop collection consists of 7 new generation surprising bulbs.

Their innovative technology allows the diffusion of light from their base, through the creative forms of the Plexiglas who composes them, to create true real luminous illusions. On the practical side, their E27 base is intended for all decorative uses, suspended or standing. The Galaxy Series is a great fit for constellation effects with multiple bulbs!

Finally, as they are LED bulbs, they are also gentle on the environment.
